

DSA Detection®

SINGLE FOCUS. SINGLE SOURCE.

Inert Mail Threat Kit MTK3000 (X-Ray Correct)

This kit contains a wide variety of mail threats security officers may encounter. All the devices are X-ray correct and will respond in an X-ray system just like a real device. The kit includes many types of "mail bombs" with firing circuits known to have been used in actual attacks. The kit also includes simulated anthrax letters which will allow you to train your security officers to identify a possible white powder/anthrax threat.

Inert Mail Threat Kit		
Qty	Part Name	Part Num
1	MTK1101 Inert Micro Switch Pressure Release	MTK1101
